Junior Pet Health Plan

Bringing a new puppy or kitten into your family is exciting and fun, but you do need to make sure that the practicalities of their first year's health and well-being are taken care of. As a practice we want to help you to look after your pet in the best possible way, and our Pet Health Plan is a great way for us to support you in this. By paying a monthly subscription you are able to spread the cost of your pet's first year of routine veterinary care, and save money.

We encourage you to join this plan because routine care is an important part of responsible pet ownership - keeping your pet in the best possible health and helping them lead a happier life. The plan covers the cost of those routine appointments, treatments and surgical procedures not covered by your pet insurance and helps you, and us, to keep your pet in the best of health.

Joining the plan also gives you access to a range of discounts and benefits, but even if you have no need of these services you will still save 15% on your pet's first year of 'preventative care' and neutering. At the end of 12 months your pet will transfer to our adult health plan and your monthly payments will reduce.

We cannot emphasise enough how important it is to provide routine veterinary care for your pet to minimise the likelihood and impact of them being unwell. Spreading the cost throughout the year and receiving discounts on clinical services, makes joining our Pet Health Plan the smart choice.
